Sep 28, 2016 Category:1964 births Category:Croats of Bosnia and Herzegovina Category:Croatian architects Category:Living people Category:University of Osijek alumniQ: Why do all processes have a pid? What's the big deal with having a "pid"? What's the point of that? A: If you don't assign a process an ID, then the operating system will reuse a free ID. However, the OS has no way to know which process has a given ID. So, a process that might have recently terminated (might have finished up its I/O) might be assigned the same ID as a process that's currently running. So, if you don't know the ID of a running process, you have to wait for it to terminate (to give you its ID) to give you a chance to run it again. At a high level, this means you can't run multiple versions of the same software (assuming the software cannot tell the difference between the two) Home Automation Home automation products are designed to turn your home into a smarter, safer, more comfortable living environment. The Hub 3 Connects to your Existing Smart Home Devices – from Over 1,500 Smart Home manufacturers – including iDevices, Belkin, and TRENDnet Simple Setup - An easy-to-understand interface. No wiring. No monthly fees. Each Hub 3 is pre-installed with a WiFi-enabled hub. For a home network that is setup, free and ready to go, the Hub 3 is the perfect solution for your smart home. The Hub 3 also connects to your security cameras, baby monitors, smoke detectors, and home automation devices. Running Your Home Automation System is Simple & Doesn't Cost a Thing – You can start right away with your Hub 3 and add sensors at no charge. Unlike monthly fee's or hidden fees associated with subscription services, you pay only for the amount of data you use. Think your smart home products may need their own smart hub? Think again! The WiFi-enabled hub in the Hub 3 is just the right solution for your smart home projects. The Hub 3 is a great option if you are a DIY person or want to customize your own home automation device.
